Grain Directions

Put 2 qts of water into a pan, 3-4 qt size. Bring water to a boil, turn down heat to a simmer and add the cracked grain. Lightly stir for the next 20 minutes.

Then pour this through a strainer or cheesecloth into your boiling pot. Save the spent grain and bring 2 more qts. of water to a boil. Pour this over the spent grain as a rinse.

Now your wort water is ready to follow the regular directions as before.

Relax, have a brew!
